## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated clearly by Takada et al (U.S. 4,203,906).

Takada et al disclose a catalytic vapor phase oxidation process by using a fixedbed shell and tube heat exchange type reactor (see col. 2 ,lines 42-45) in which an propylene is oxidized into acrylic acid; for example, in the reactor , a reaction gas mixture , comprising 7.0% by volume of propylene, 12.6 5 by volume of oxygen, 10.0 % by volume of steam and balance of inert nitrogen gas, was treated to yield acrylic acid (see col. 10 , lines 1-30). This is identical with the claims.
